

# Barantsev Stepan Alexeyevich

Birth date: 15.04.1999

Cyprus, Limassol

Phone number: +79150694904

E-mail: [stepan.barantsev@gmail.com](mailto:stepan.barantsev@gmail.com)

- **Education:** Graduated with distinction from Bauman Moscow State Technical University (Department of Computer Systems and Networks). In addition to the main curriculum, several programming and testing courses were finished, e.g.,
  - Python: basics and application (<https://stepik.org/course/512/>)
  - Programming in C++ (<https://stepik.org/course/7>)
  - Web application testing (<http://software-testing.ru/edu/1-schedule/189-web>)
  - Python programming for testers (<http://software-testing.ru/edu/1-schedule/233-python>)
  - Selenium: starting level (<http://software-testing.ru/edu/1-schedule/185-selenium>)
- **Skills:**
  - Familiar with the following programming languages:
    - Python
    - Kotlin
    - JavaScript
    - C++
    - SQL
    - Assembler (MASM)
    - Ruby (Ruby on Rails)
    - Delphi
  - In the context of testing, I have experience with:
    - Pytest, JUnit
    - Selenium
    - Appium
    - Allure
    - Selenoid, Github Actions, Docker, MockServer
    - Wireshark, Postman
  - Working with relational databases (MySQL, Postgre), and non-relational (faunadb)
  - Web programming experience (Express, Flask, Ruby on Rails, JQuery)
  - Experience working with major operating systems, both mobile and desktop
  - Familiar with design patterns, I have written architecture for UI and API tests several times from scratch, in particular, I know the Page Objects pattern well
  - English level is B1-B2
- **Work experience:**
  - I have recorded a course “Python for beginners” (for absolute beginners in programming <http://pythonforbeginners.ru/>) and provide full support for this course (grading homework, consulting students)
  - Passed a six month internship at Yandex (trainee tester, took part in testing Yandex.Navigator).

- I worked at RTLabs as a testing engineer. Engaged in automation of the web interface (Python + Selenium + Gitlab CI + Selenoid)
- Now I am working at inDriver as an automated tester. I've been involved in various projects, API testing, Web UI, and Mobile UI. I worked most of all with mobile testing, but only android (Kotlin + Appium + Selenium + Github Actions + Selenoid)
- **Implemented projects:**
  - Automatic generation of certificates for a website <http://software-testing.ru> (JavaScript Express + API LMS Moodle + faunadb)
  - Python Telegram-bot for my course: [https://github.com/StepanBarantsev/course\\_bot](https://github.com/StepanBarantsev/course_bot)
  - Course management system as part of the thesis (Flask + pyTelegramBotApi): [https://github.com/StepanBarantsev/course\\_management](https://github.com/StepanBarantsev/course_management)
  - Demonstrational API testing project (Kotlin + Junit + Rest-assured): [https://github.com/StepanBarantsev/test\\_api\\_cotlin](https://github.com/StepanBarantsev/test_api_cotlin)
  - Training project related to web automation (Python + Selenium) <https://github.com/StepanBarantsev/adressbook>.
  - Game for Android (using the RenPy engine)
  - At work, for convenience, I implemented some utilities, e.g., gluing several Allure reports into one master report, automatic Page Objects generator
- **Personal skills:**
  - Rapid learning ability, the ability to perceive a large amount of information
  - High level of responsibility and diligence
  - Attentiveness and perseverance
  - Lack of bad habits
